APRIL MEETING:

Last month, our guest was Susan Wolfe. The projects were a basket and three cards. Susan brought everything needed for all four projects, including a die cut machine.

Susan provided color-coordinated papers and card stock for each project. She demonstrated how each project was made and provided samples to help everyone with the placement of the various elements involved in each of the projects. Participants were able to select the rubber stamps and embellishments they wanted to use for their cards and basket. Ink pads were color coordinated to match the papers.

Everything was well organized and it was interesting to go from table to table at the end of the afternoon to see all the variations of the cards and basket.
